ezCaretech Co., Ltd.
BESTCare 2.0B

To Drummond Group:

The Mandatory Disclosure statement of costs and any additional transparency information for our certified product(s) is attached to this letter and will be posted along with the required product information on our website here:

<http://www.ezcaretech.com/>

***Note:** Your URL must include both the attached mandatory disclosure information and all bullets referenced in the Product Information section of this Mandatory Disclosures Instructions page.

We agree to notify Drummond Group of any and all future changes to our transparency and disclosures language for this certified product-version.

We understand and agree that the ONC Health IT Certification Program Final Rule statement gives Drummond Group, as an ONC-ACB, the sole responsibility for ensuring compliance and determining appropriate consequences if EHR technology developers fail to divulge accurate transparency and disclosures information.

We understand and agree that we will provide to Drummond Group copies of or give access to any and all websites, marketing materials, communication statements, and other assertions made by your organization regarding the ONC certification status of this product in a reasonable time to ensure the transparency and disclosures information is being accurately disclosed.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(a)(1) CPOE-Medication	This capability allows users to record, change, and access medication orders.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(a)(2) CPOE-Laboratory	This capability allows users to record, change, and access laboratory orders.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(a)(3) CPOE-Imaging	This capability allows users to record, change, and access diagnostic images.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(a)(4) Drug-drug, Drug-allergy Interaction Checks	This capability automatically checks drug-drug and drug-allergy interactions, and is included as a part of clinical decision support in CPOE (170.315(a)(1)). This function also enables users to change severity levels of drug-drug interaction.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers. An individual contract and associated fees - such as recurring annual license fee, which are determined by the service vendor.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(a)(5) Demographics	This capability allows users to record, modify, and access patient demographics, including preferred language, sex, race, ethnicity, date of birth, gender identity, sexual orientation	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(a)(12) Family Health History	This capacity allows users to record, change, and access a patient's family health history.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315 (a)(14) Implantable Device List	This capacity allows users to register a patient's implantable device information, using NLM API, and to access the information.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(b)(1) Transitions of Care	This capacity allows users to create, send, receive, and read documents formatted in accordance with HL7 recommendation (i.e. C-CDA documents) when transitioning a patient in ambulatory and inpatient settings. When a document is received, users are able to view health information by sections, as well as to set the order and initial quantity of sections.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(b)(2) Clinical Information	This capacity allows users to incorporate and reconcile documents formatted in accordance with HL7 recommendation	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
Reconciliation and Incorporation	(i.e. C-CDA documents) when transitioning a patient in ambulatory and inpatient settings. When a document is received, users are able to view health information by sections, as well as to set the order and initial quantity of sections.	Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(b)(10) Electronic Health Information (EHI) Export	This capacity allows to export electronic health information (EHI).	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(c)(1) Clinical Quality Measures - record and export	This capacity allows users to record, import, export, calculate, and report Clinical Quality Measures. Clinical Quality Measures (CQMs) support users to achieve the following health care goals: 1) better health, 2) better health care, and 3) lower cost.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(c)(2) Clinical Quality Measures - import and calculate	This capacity allows users to record, import, export, calculate, and report Clinical Quality Measures. Clinical Quality Measures (CQMs) support users to achieve the following health care goals: 1) better health, 2) better health care, and 3) lower cost.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(c)(3) Clinical Quality Measures - report	This capacity allows users to record, import, export, calculate, and report Clinical Quality Measures. Clinical Quality Measures (CQMs) support users to achieve the following health care goals:	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
	1) better health, 2) better health care, and 3) lower cost.	per facility based on the number of beds or providers.
170.315(d)(1) Authentication, Access Control, Authorization	This capacity allows users to get authentication and privileges that give access to electronic health information.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(2) Auditable Events and Tamper-Resistant	This capacity allows audit logs to be automatically recorded as default, and enables authorized users to change the status of audit logs.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(3) Audit Report(s)	This capacity allows users to create an audit report for a specific period and by an audit type.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(4) Amendments	This capacity allows users to electronically select medical records that a patient requested an amendment, and to accept or deny the amendment.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(d)(5) Automatic Access Time-out	This capacity prevents users from gaining further access to an electronic session after a predetermined time of inactivity. Also it only allows authorized users to set the predetermined time.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(6) Emergency Access	This capacity allows users to access patients' electronic health information, which they cannot access in a non-emergency setting, once authorized users activate an emergency setting.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(7) End-User Device Encryption	This technology is designed to prevent electronic health information from being locally stored in end-user devices when an end-user stops using the EHR.	Storing electronic health information on end-user device is not supported.
170.315(d)(8) Integrity	This capacity, using hashing algorithm, prevents electronic health information from being altered.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(9) Trusted Connection	This capacity, using encryption method and hashing algorithm, electronic health information is connected.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(d)(11) Accounting of Disclosures	This capacity allows users to register disclosure records of electronic health information and to view a list of the registered records.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(12) Encrypt Authentication Credentials	This technology is designed to encrypt user's authentication.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(d)(13) Multi-factor Authentication	This capacity allows users to authenticate user's account with multiple factors.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(1) Transmission to Immunization Registries	This allows the system to transmit immunization reports to an immunization registry upon the generation of a patient's immunization data.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(2) Transmission to Public Health Agencies -	This allows the system to transmit syndromic surveillance reports to Public Health Agencies upon the generation of a patient's visit data for their treatment in	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
Syndromic Surveillance	urgent care, emergency department, and inpatient admission.	BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(3) Transmission to Public Health Agencies - Reportable Laboratory Tests and Value/Results	This allows the system to transmit to Public Health Agencies upon the generation of a patient's laboratory tests and laboratory results.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(5) Transmission to Public Health Agencies - Electronic Case Reporting	This allows the system to transmit an electronic case report to Public Health Agencies upon the generation of a patient's data.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(6) Transmission to Public Health Agencies - Antimicrobial Use and Resistance Reporting	This allows the system to transmit an antimicrobial use and resistance report to Public Health Agencies upon the generation of a patient's data.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(f)(7) Transmission to Public Health Agencies - Health Care Surveys	This allows the system to transmit a health survey report to Public Health Agencies upon the generation of a patient's data.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(g)(2) Automated measure calculation	This allows users to calculate measures for Meaningful Use (MU) and MIPS, and to create a MU report.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(g)(3) Safety-enhanced Design	User-centered design practice is applied to the certified capabilities in order to verify and ensure that users can easily use the system.	N/A
170.315(g)(4) Quality Management System	This ensures that a quality management system has been implemented.	N/A
170.315(g)(5) Accessibility-Centered Design	This ensures that an accessibility-centered design has been implemented.	N/A
170.315(g)(6) Consolidated CDA Creation Performance	This allows users to create C-CDA documents in accordance with HL7 standard, following its rules for templates, vocabularies and completeness.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(g)(7) Application Access - Patient Selection	This allows to access the application to select a patient.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.

Capability	Description of Capability	Costs or Fees <i>Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability -OR- in connection with the data generated in the course using the capability</i>
170.315(g)(9) Application Access - All Data Request	This allows to access the application to request all data.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
170.315(g)(10) Standardized API for Patient and Population Services	This allows to provide the standardized API for patient and population services.	A one-time software license fee, implementation service fee and recurring maintenance fee are to be paid by a user. Maintenance includes technical support for BESTCare 2.0B and standard release updates. Software license fee is payable per facility based on the number of beds or providers.
